ThinkPad X60 Tablet

- Shipping December 7, 2006
- Prices Starting from \$1799
- Available at www.lenovo.com

Product Description:

The thinnest and lightest convertible tablet on the market today, Lenovo's patent-pending *Active Rotate function*, allows the tablet screen to immediately orient to the user, no matter which direction it turns. There are three screen options to choose from, XGA, hi-res SXGA+, and the industry's only indoor/outdoor panel with touch screen capability. Every conceivable wireless connectivity is built into the system; MIMO high-speed WiFi, embedded WAN from Verizon or Cingular, and BlueTooth. At around 3.5-lbs. the system packs a performance punch with Intel Core Duo processors, high-speed disks up to 120GB, accommodates up to 4GB of RAM to be Vista™ Premium Ready. Battery life can reach heights of up to 7.5 hrs, and the tablet is built to last with the integrated "air-bag" and shock mounted disk-drives protection, the quad-metal rotating hinge, and magnesium alloy covers. The fingerprint-reader combined with the hardware encryption chip makes the X60 the most secure tablet on the planet.

Who cares:

For anyone that wants a single tool that does the work of multiple devices and is mobile, secure, reliable, and connects from anywhere with all work-day battery life.

Why bother:

Because it's light-weight, the battery last forever, contains hush-hush security, the screen auto-spins to how you are working, and its quality is legendary ThinkPad made.
