Product Name: **VistaPix IS70**
First Retail Availability: **October 2006**
End-User Pricing: **\$479.00**

High quality spotting scope and state-of-the-art digital camera in one full-featured, easy-to-use unit. Capture the action closer than ever before with this 3MP digital camera spotting scope. A unique product, advanced features, unbeatable price. The VistaPix IS70 features a 70mm spotting scope with 14x magnification. The 3 megapixel camera features a 2" LCD screen for a sharp, clear imaging preview; 6x digital zoom; a digital focus meter for quick, sharp focus; dual power for high magnification or wide field of view; and continuous video capability. And with its great close focus, the IS70 can capture amazing detail -- perfect for getting up close with a variety of nature's treasures both great and small.

Who Cares? Avid bird watchers and nature lovers can now easily capture and share images with family and friends, images that before were lost.

Why Bother? A convenient, hassle-free way of spotting and photographing distant objects at an affordable price.
