**The Tornado™** \$59.95 available online [www.thetornado.com](http://www.thetornado.com) October 2006

The newest, fastest and easiest way to move all your “stuff” from your old PC to your new PC.

**It's so easy to use ANYONE can network two computers.**

Just plug it in and within seconds you can start transferring files between two PCs, it's that simple! Built-in software automatically loads and runs itself within seconds.

The Tornado is USB 2.0 and 1.1 compatible and allows users to move files between any Windows® computers. Software displays the contents of both PCs and has transfer speeds of up to 25 Mb/sec. Great to use for old PC to new PC migration or data back-up and has retractable cables for easy carry and storage.

**Why Bother:** Once connected to each PC The Tornado™ automatically displays both hard drives on the screen, enabling the user to quickly locate and copy files to and from each system.

**Who Cares:** The Tornado is the first and only PC-to-PC data transfer tool that operates at USB 2.0 speeds with no software to install it is also pocket size and has retractable cables allowing it to be easily carried anywhere.
