**Product Name:** i.Sound Time Travel

**MSRP:** \$49.99

**Retail Availability:** September 30, 2006 at [www.isound.net](http://www.isound.net)

**Product Description:** The i.Sound Time Travel (DIGPOD-365) is an ultra-portable and compact iPod speaker system with an added alarm clock with wake-me-to-music function that allows users to set the alarm to music from their iPod. The blue backlit digital LED clock display prominently tells the time and date, while the built-in amplifier and twin micro-drivers provide high-quality sound. The i.Sound Time Travel charges and syncs the iPod while in use and provides over 60 hours of battery life for people on the go. The i.Sound Time Travel is also compatible with all iPod models and includes adaptable brackets for a perfect fit.

### Who cares?

For the busy traveler or consumer with limited dresser space, the i.Sound Time Travel is one of the smallest iPod speaker systems on the market that also includes a digital clock, alarm function and an extended 60 hours of battery life for worry-free traveling and use.

### Why bother?

The i.Sound Time Travel leads the trend in gadgets that are getting smaller, but does not lose any convenient, user-friendly features and unlike other alarm clocks, the i.Sound Time Travel allows consumers to personalize their morning wake-up call with music from their own iPod.
