November 1, 2006

Product Description:

"Move my Outlook information to my RAZR." Designed for the busy professional, SyncCell answers the call to provide a fast and simple way to accurately sync your Outlook Calendar and Contacts to your RAZR or other Motorola Phone. SyncCell's common sense approach moves items one way from the PC to the phone with no chance of Outlook corruption...the only solution designed to do so! In addition, all Outlook recurring events are accurately handled.

Key features include: Patent Pending OneSync, contact manager, calendar manager, transfer pictures and videos, upload ringtones, internet connection, backup contacts and appointments, quickly restore information if phone is lost or stolen, send emails and text messages, and also Bluetooth compatible. Motorola phone customers finally have an accurate, convenient, and inexpensive alternative to carrying multiple devices or to spending hundreds of dollars on a more expensive option as SyncCell provides *PDA* like functionality for your existing Motorola phone. SyncCell supports most Motorola phones including the popular RAZR and SLVR models.

Who Cares?

Millions of Motorola phone customers who have been waiting for an accurate, convenient, and common sense method for meeting the following demand:

"Just sync my Outlook information over to my phone!"

Why Bother?

Business professionals desire accurate and convenient daily synchronization to keep their Motorola phones in sync, without ever having to worry about the sync software corrupting their Outlook files again.
