Aegis Mini

Date of first retail availability June, 2006

MSRP	USB 2.0	FireWire
Aegis Mini 30GB	\$149	\$159
Aegis Mini 60GB	\$199	\$209
Aegis Mini 80GB	\$249	\$259

The Aegis Mini ultra-portable 1.8" hard drive instantly adds up to 80GB of capacity which is ideal for storing, sharing or backing up your valuable data. Compatible with both PC and Mac, Apricorn's Aegis Mini gives you the option of a Hi-Speed USB 2.0 or FireWire interface. The integrated cable wraps neatly around the Mini when not in use and draws all its power from the laptop, so an AC adapter is never needed. The Aegis Mini is protected by a 16-point omnidirectional shockmounting system. Pair this with Apricorn's Data Protection Software Suite and tiny footprint and you have the most comprehensive mobile backup and storage system available.

USB model shown

Who cares?

The Aegis Mini is ideal for the road warrior or just those with a mobile lifestyle needing a secure, reliable and ultra-portable method of carrying around or backing up their data.

Why bother?

The Aegis Mini's ultra-portable design with tiny size, integrated cable, extensive shockmounting and comprehensive backup, synchronization and encryption software, makes this external hard drive the ideal choice for the road warrior.
