SOLOIST™ UNIVERSAL SOUND SYSTEM
Winner of the 2007 CES Innovations Award
MSRP: \$149
First Available: October, 2006

Directed's Soloist Universal Sound System docks 7 different SIRIUS universal plug and play radios (including Stiletto 100, Sportster 4, Starmate 4 and Stratus) plus iPods! It uses patented NXT SurfaceSound flat panel speaker technology, powered by a full-range, 20-watt Tripath amplifier. Soloist also comes with a built-in alarm clock with snooze button, allowing users to wake to their favorite SIRIUS or iPod content. Available at national and regional CE retailers.

Who Cares? Potentially anyone with an iPod, and SIRIUS subscribers with the latest receivers.

Why bother? Sounds great, affordable price point, only combined SIRIUS / iPod dock.
