Model: PCGamerBike Mini™
Available: August 1, 2006
Available At: www.GameCycles.com
End-User Price: \$179

Description:

This is the next generation interactive exercise bike. It's configurable, customizable and about 100 times faster than any other bike on the market. Just plug it into your USB port and its ready go. Interacts with ANY PC game that accepts keyboard input. Pedal forward to move your character / vehicle forward, pedal backwards to move backwards. Your exercise progress is automatically captured for you whether you play games or not. Open the exercise history window to see your progress for any day that you've used the bike. Comes with free with Island Worlds™ (www.IslandWorlds.com) Cyber-Fitness software. Finally, the PCGamerBike is expandable. You can plug in additional modules (PlayStation®/PS2® games, PC Pedaler™, AV Pedaler™ and TV Pedaler™) to enhance your exercise experience (<http://www.gamecycles.com/products.php?cat=56>).

Who Cares?

Parents with overweight kids, physical therapists looking for ways to motivate their patients, the busy person who works or plays on the computer and can't seem to find the time to exercise, and the person who is looking for a fun and motivating way to get the exercise they need.

Why Bother?

Because you're not getting enough exercise and you know that an exercise routine that you enjoy is far easier to maintain than one that you dread.
